Civil Engineer With A Track Record Of Successful Project Management

PROFESSIONAL SUMMARY:

Results-driven and highly skilled Senior Civil Engineer with over 8 years of experience in leading and delivering successful civil engineering projects. Adept at providing innovative solutions and ensuring project efficiency. Proven ability to collaborate effectively with cross-functional teams.

WORK EXPERIENCE:

Civil Engineer

Larsen & Toubro Hydrocarbon Engineering Limited (LTHE), Adrar, Algeria | 2021 – 2023

LTHE is a global leader providing comprehensive solutions for intricate hydrocarbon projects, specializing in engineering, procurement, fabrication, construction, and project management.

South West Gas Field Development Project (SWGFD Project)
Central Processing Facilities (CPF) Engineering, Procurement, Construction, and Commissioning (EPCC)

- Managed and supervised the full project lifecycle, overseeing the design to construction phases. Ensured the safe and timely execution of various construction projects, ranging from small to large-scale.
- Conducted comprehensive on-site investigations to gather essential data, including topography, soil conditions, and environmental factors. Analyzed gathered information to guide effective project planning and decision-making.
- Executed in-depth technical and feasibility studies, translating project requirements into detailed blueprints. Ensured compliance with technical specifications and standards, leading to precise and efficient project execution.
- Assessed potential risks related to construction projects, materials procurement, and project costs. Implemented proactive risk mitigation strategies, contributing to cost-effective project management.
- Offered innovative solutions and demonstrated creative problem-solving skills to address emerging issues during project execution. Ensured that construction projects remained on schedule and within budget.

Civil Engineer

GS Automation. Oran, Algeria. 2019 – 2020

GS Automation, a leading company specializing in industrial automation and control systems.

- Executed detailed design tasks utilizing AutoCAD for the installation of gas and fire detectors within the Arzew refinery.
- Ensured meticulous detailing aligned with safety standards and technical requirements, crucial for optimal operational safety.
- Collaborated seamlessly with the engineering team, fostering a cohesive approach to the integration of detectors into the existing system.
- Applied effective communication skills to streamline the integration process, minimizing potential conflicts.
- Skillfully managed design changes, facilitating the prompt incorporation of revisions into plans.

Civil Engineer

S.E.T.S (Société d'Etudes Techniques de Sétif). Adrar, Algeria. 2017 – 2019

SETS is a multidisciplinary engineering office specializing in transportation infrastructure engineering services.

- Successfully delivered diverse projects, notably the 190 KM asphalt paving project for the Adrar-Aoulef road, RN51A road maintenance, CW15 road rehabilitation, and the Fem El Kheneg bridge project.

- Proactively addressed challenges, providing precise solutions to mitigate potential issues and contribute to the smooth progress of projects.

- Collaborated with various departments to formulate plans and accurate cost estimates for road, parking lot, and drainage projects.

- Demonstrated a strong ability to foster cross-functional teamwork.

- Consistently ensured on-time and within-budget completion of all assigned projects, showcasing dedication to project efficiency.

INTERNSHIPS :

Intern

Contrôle Technique De la Constructions (CTC). Oran, Algeria. 2014

Focused and detail-driven intern contributing to the quality assessment of construction materials and structures through advanced non-destructive testing techniques.

- Utilized Schmidt Sclerometer to measure concrete resistance to compression, providing critical insights into the structural integrity of materials. This skill is transferrable to ensuring robust construction practices.

- Utilized ultrasound technology to detect hidden defects within concrete surfaces, showcasing acute attention to detail and the ability to identify potential vulnerabilities. This significantly contributed to the overall safety of structures.

- Gained hands-on experience in non-destructive testing methodologies, highlighting a solid foundation in technical practices contributing to the safety and reliability of construction projects.

EDUCATION

Master in Civil Engineering
Djillali Liabes University. Sidi Bel Abbes, Algeria. 2016

SKILLS & COMPETANCIES:

TECHNICAL SKILLS

Microsoft Project - Trello - Asana - Slack - Microsoft office : Word, Excel, Power point - AutoCAD - Navisworks - Robot Structural Analyses - Etabs - Sap 2000 - Solidworks - Adobe : Illustrator - Photoshop - Gimps - Inkscape.

INTERPERSONELLES SKILLS

Communication - Leadership - Decision making - Problem solving - Team Collaboration - Conflict Resolution - Adaptability - Stakeholder Engagement - Analytical Thinking - Time Management – Attention to Detail - Negotiation Skills - Critical Thinking

LANGUAGE SKILLS

Arabic: Native - **English:** Excellent - **French:** Excellent.
